## (54) METHOD FOR MANAGING DISTRIBUTED COMPUTER RESOURCE

(57)Abstract:
PROBLEM TO BE SOLVED: To use distributed computer resources for an application from a different application when the application starts communication with the different application.
SOLUTION: Resource tables 13A and 23A for managing the computer resources utilizable by the applications 1 and 2 are provided corresponding to the applications 1 and 2. When a certain application 1 is connected to the different application 2 and performs a cooperative processing, by preparing the resource tables 13A and 23A for managing the resources of the both by mutually copying the respective resource tables 13A and 23A and referring to them by the respective applications 1 and 2, the respective applications 1 and 2 utilize the computer resources of the both. Thus, the two applications mutually utilize the distributed computer resources utilized by them until then, many more distributed computer resources are effectively utilized and execution performance is improved.
